

INTRODUCTION TO ARTIFICIAL INTELLIGENCE

"What makes a machine intelligent?"

"AI is a computer system able to perform tasks that ordinarily require human intelligence... Many of these artificial intelligence systems are powered by machine learning, some of them are powered by deep learning and some of them are powered by very boring things like rules."

WALLPA

Advanced AI

Artificial intelligence (AI) is the basis for mimicking human intelligence processes through the creation and application of algorithms built into a dynamic computing environment.

Stated simply, AI is trying to make computers think and act like humans.
